OZONE SYSTEMS

*Sanitize **every wash load** by eliminating up to 99.99% of viruses, bacteria and superbugs*

For superior laundering, unmatched disinfection and long-term savings, EcoTex is the proven cold water catalyst for commercial laundry applications. The system injects ozone-infused water into the wash load to rapidly oxidize soils, eliminate microbes and improve chemical effectiveness while using 90% less hot water.

Eco-Friendly – Ozone is one of nature's most powerful oxidizers available and reduces wastewater pollution.

Better Sanitation – Ozone (O_3) is 1.5x more effective and faster acting as a disinfectant than chlorine bleach.

Use Less Chemicals – Significantly reduces the need for harsh detergents and chemicals by up to 30%.

Saves Water & Energy – Cuts water usage by 20-40% and decreases the need for hot water by up to 90%.

Saves Time & Money – Fewer inputs, shorter cycle times and faster drying saves on labor costs.

Better Results – Ozone-infused water produces brighter, softer whites and extends the life of textiles.

OPL Applications

- Hospitals & Healthcare
- Nursing Homes
- Gyms & Athletic Facilities
- Hospitality
- Correctional Facilities

Ozone Benefits

- Reduces Microbes More Effectively Than Thermal Disinfection
- Use Less Detergent and Chemicals
- Water and Energy Savings
- Softer Fabrics and Brighter Whites
- Extends the Life of Linens
- Meets Occupational Health & Safety Act Requirements
- Compact Design and Easy Installation
- Compatible with All Brands and Sizes of Commercial Washer-Extractors
- Fast ROI (8-18 Months)
